HIGH VOLUME ENTERPRISE PAYMENTS

Chargent VolumePay is a cloud-based platform for high volume enterprise payments. Using the scalability of Salesforce and capacity of CyberSource Batch Upload, Chargent VolumePay can process upwards of 6 million transactions a month, directly from your Salesforce CRM database. Complete your 360 degree view of your customer by keeping all of your customer payment data in your CRM system.

If you are upgrading from a legacy ERP or billing system to the Salesforce platform, you now have an option for connecting payments as well. Avoid uncertainty around the cost and time required to build a custom integration—Chargent VolumePay offers a battle-hardened, ready-to-deploy system that can be implemented in as little as a few months for a fixed cost.

Chargent VolumePay is 100% Salesforce native, meaning all your data remains securely in your Salesforce account, minimizing compliance issues and protecting your customers. Transactions are securely uploaded directly to CyberSource.

Now you can take advantage of the incredible performance and scalability of Salesforce, and connect it to a high capacity payment solution—all while maintaining total control and security over your data.

Contact us today for a detailed discussion of what Chargent VolumePay can do for your enterprise.
